

Data from stone 8 with citation

The data in this went over the effects of covid on trade throughout the years and when it happened. In the data set they included year, date, weekday, country, and the value. These went over when it happened and how they were transported.

NZ, stats. (2021). *Effects of Covid-19 on Trades*. CSV files for download. <https://www.stats.govt.nz/large-datasets/csv-files-for-download/>

List of Colum names:

Year, Date, weekday, Country, Commodity, Transport Mode, Measure, value, and Cumulative

**Year** – The year it happened

**Date** – the date it happened (what day)

**Country** – The country it was in

**Commodity** – A substance that can be traded bought or sold

**Transport Mode** – How it was transported like railroads, roadways, plane

**Measure** – The rate of change from one to another

**Value** – How much it is worth

**Cumulative** - a technical analysis tool used in the financial markets to provide a running total of the periodic values for a specific indicator.

Why I chose this – I chose this because I found it very interesting and wanted to see how covid affects this.
